

WEEK 5: Directional Signs & ASL Storytelling

This week, we'll be talking about directional signs and how they can be used to tell stories.

The vocabulary is taken from *Learn How To Sign (YouTube Channel)*:

ASL STORYTELLING

Everyone loves a good story, especially by a skilled story-teller. We hang on every word as they paint visual pictures in our mind using their words. The deaf love great story-tellers too, but rather than words, an ASL storyteller will visually set the stage in the spaces around them using a combination of directional signs, shoulder shifting, changing the sign size, speed and visual other markers. They can paint the same kinds of pictures that leave us anticipating every sign.

If you have practiced any of the ASL worship songs, you'll know that some of these techniques were used to convey the meaning of the song clearly while choosing signs that tell a story and are visually appealing.
